

### How to copy baking programs

In order to facilitate the entry of individual programs for many hearths, it suffices to enter the programs in only one hearth.

After that, the programs can be transferred to the other control systems.

With this function, no hearth should be in baking mode!

- ▶ First, select the baking program on the hearth that has to be transferred.
- ▶ Afterwards, press the lighting key (2) F and the function key (5) simultaneously (for control reasons, all hearths show the transferred program number after the transfer procedure is completed).
- ▶ Press the F + P1 + P3 keys at the same time to transfer all 30 programs from any hearth to all other hearths simultaneously.
